## Projects

### Corona Virus in Vancouver Website

JAVASCRIPT + HTML + CSS

Completed

- This project is a website where the user is able to interact with a map by clicking on an area to see the outbreaks reported by Vancouver Coastal Health, or add new outbreaks that they know of.

### Personalized Strength Program Website

JAVASCRIPT + HTML + CSS

Completed

- This HTML website has been created for myself and my peers; those of us who enjoy to lift weights. It takes input from the user to create a personalized strength program based off a number of variables. It will guide you through the next six weeks at the gym.

### Calendar Application

JAVA

Completed

- This project is a calendar application, where the user is able to add and remove objectives to a specific date, mark them as complete, view the days, and has the option of saving or loading a project.
