Projects

TypeR App

PYTHON + JAVA + OBJECTIVE-C + XCODE

- This IOS App's purpose is to help users in a way that will save them lots of time and make typing text up much more convenient. In instances where they need to convert hard copy text into digital, this app will be particularly useful. Through artificial intelligence, this app is trained to recognize and interpret letters from images provided by the user, and provides it in a text format

In Progress

Personalized Strength Program Website

JAVASCRIPT + HTML + CSS

- This HTML website has been created for myself and my peers; those of us who enjoy to lift weights. It takes input from the user to create a personalized strength program based off a number of variables. It will guide you through the next six weeks at the gym.

Completed
