PROFESSIONAL EXPERIENCE

Amazon - *Software Development Engineer Intern*   Jan 2022 – Present
- Currently interning for Gurupa, the team responsible for one of Amazon's primary page assembly engines
- Working on a data visualization tool to help developers visualize and interact with web page data

UBC Computer Science – *NLP Research Assistant*   Sep 2022 – Present
- Conducting research for my honour's **thesis** with Professor Vered Schwartz on the evaluation of generative tasks

Amazon - *Software Development Engineer Intern*   May 2022 – Aug 2022
- Engineered for Amazon's platform independent HTTP interface for **rendering content** that provides customer ready rendered HTML for web pages while giving the client control over the types of content and UI
- Architected the design and development for a command line interface that uses cloud computing to **generate** and **register** consumer ready metadata to enable **Page Self-Service-Onboarding and Updating**
- Reduced team operation load and improved client experience by working on **multiple services** across **different teams** to automate a process that has **~5 requests/week** and a **10 day service-level agreement**

Clir Renewables - *Software Developer Intern*   Sep 2021 – Dec 2021
- Built and deployed a reporting and managing software that maintains **1000+** renewable energy assets
- Integrated changes to improve code functionality and efficiency, introduce features, enhance user experience, fix bugs, and wrote tests for an **internal tool portal, data access, user authentication,** and **notification** services

Copysmith - *Software Engineer Intern*   Sep 2020 – Oct 2020
- Independently **built key-features of the front-end interface** for an early-stage startup using React + HTML/CSS

UBC Computer Science – *Undergraduate Teaching Assistant*   Oct 2020 – Present
- Led programming labs, office hours and review sessions for **over 300** students in principle cs courses
  - Introduction to Software Engineering (CPSC 310), Models of Computation (CPSC 121)

PERSONAL PROJECTS

Emotion Classifier API | *Python*
- Developed Language Models that classify text as anger, joy, love, sadness, surprise, or fear

EasyCC–NWHacks Honorable Mention | *JavaScript + CSS + HTML* | devpost.com/software/easycc
- Constructed a chrome extension that provides **real-time closed captions** to overcome hardships of online school
- Integrated tools to capture audio using Node.js, processed speech into Google Cloud's Speech-to-Text engine, used socket.io to display transcripts

BikePark Android Application | *Java + XML*
- Created an android app where a user can report bike theft and receive **risk assessments** for bike **theft** based on their location, allowing users to make safe and informed decisions for where to leave their bike
- Integrated Google Admob **advertisements**, formerly on the **Google Playstore** with users across **18 countries**

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, C, C++, HTML/CSS, PHP/MySQL
Technologies: AWS (Lambda, API, Step Fns, CloudFormation, DynamoDB, S3), Azure, Git, React, Redux, Node.js, MongoDB, Docker

EDUCATION

B.Sc. Honours Computer Science | **University of British Columbia** – *4.0 GPA*   Sep 2019 - Present
Selected Coursework: ML and Data Mining, Advanced Algorithms Design and Analysis, Computer Vision, NLP
Activities: Competitive Programming Team (ACM ICPC); Tri mentoring; Computer Science Co-op; Intramurals;
